PENNINGTON[™] SMART SEED[®]

A

A. SMART SEED[®] BERMUDAGRASS

- Better results and coverage than Bermudagrass alone
- Naturally more drought-tolerant than other grass varieties
- Extremely wear-resistant with a deep root system

ITEM#	UPC	CS/PK	COVERS UP TO
100554136	0-21496-02293-2	10/1.75 lb.	1,000 sq. ft.
100554138	0-21496-02294-9	4/8.75 lb.	5,000 sq. ft.

*Not available in Louisiana

B. SMART SEED[®] TEXAS BERMUDAGRASS

- Better results and coverage than Bermudagrass alone
- Naturally more drought-tolerant than other grass varieties
- Extremely wear-resistant with a deep root system

ITEM#	UPC	CS/PK	COVERS UP TO
100554137	0-21496-02295-6	10/1.75 lb.	1,000 sq. ft.
100554139	0-21496-02296-3	4/8.75 lb.	5,000 sq. ft.

*Not available in Louisiana

B

Smart Seed[®] Bermudagrass

Smart Seed[®] Bermudagrass mixes include a temporary, cool-season companion grass that provides stability to the soil and early color, which then fades away as the heat arrives and is crowded out by bermudagrass. You get improved germination and faster establishment – which means better results compared to bermudagrass alone.

PENNINGTON[™] SMART SEED[®] *PRO*

A

B

Smart Seed[®] Pro

Pennington[®] Smart Seed[®] Pro is a composite of fine textured cultivars for use in landscapes, home lawns, parks, athletic fields and golf courses. These products are treated with Seed Fuel to promote faster coverage for premium turf performance. To seed like a pro, opt for Pennington[®] Smart Seed[®] Pro.

* Compared to ordinary seed

The Rebels® Brand.

The roots of The Rebels® Brand date back to 1979, when turf researchers at Rutgers University released a revolutionary new grass. Known as 'Rebel,' it was the very first example of what's now known as turf-type tall fescue. Compared to traditional tall fescues, Rebel offered lower growth, finer texture, darker color and denser turf – plus the drought tolerance that makes tall fescue a favorite. Generations later, with up to 40% more roots than ordinary grasses[†], The Rebels® Brand Extended Root seed

ORDINARY
GRASS SEED

THE REBELS® BRAND
TALL FESCUE

For illustrative purposes

varieties represent the best turf-type tall fescue on the market. With roots like these, it's only natural that The Rebels® Brand carries the Pennington name.

[†] Root development estimates based on plant breeding techniques and scientific research results. Results may vary depending on environmental conditions and management practices. Data on file. Published in management practices. Data on file. Published in Crop Sci. 44:1770-1775 (2004).

Generations of trust.

At Pennington, our relationship with the grass seed we sell starts long before the seed is grown. While most grass seed companies buy their seed on the open market, we work directly with a network of dedicated growers to bring you the finest grass seed. Built on decades of trust and integrity, our relationships with seed growers and their families span multiple generations. We're the only major grass seed company that works directly with farmers to ensure their success and ours. We know our seed and the farmers who grow it. From field to final product, that's the Pennington way.

PENNINGTON

GRASS SEED

A

B

A. ARGENTINE BAHIAGRASS

- Attractive grass with finer texture and darker color than Pensacola Bahiagrass
- For the Southern Coastal Plain and Gulf Coast areas

WHY IS IT SMART? Ingenuity.

With Pennington® Smart Patch, you don't need to know why your lawn has thin, bare or brown spots. Smart Patch eliminates the guesswork and frustration of lawn repairs.

REPAIRS BARE SPOTS CAUSED BY PETS AND LAWN DISEASE

Pet urine or lawn disease can create poor soil conditions, making it extremely difficult to grow grass in certain areas of your lawn.

Smart Patch includes microbes that improve the health of your soil, making your lawn whole again.

GROWS ON SLOPES AND HILLS

Nothing is more frustrating than a rainstorm washing away all of your new seed. Smart Patch includes a water-soluble tackifier that acts as a blanket for your seed, even protecting it on slopes and hills against the rain.

SEE GROWTH IN AS LITTLE AS 5 DAYS

Smart Patch is worth the wait, but you won't have to! Thanks to our patented American Ryegrass, featured in Smart Patch Sun & Shade, Tall Fescue and Dense Shade, you'll see growth in as little as five days*. **

*Smart Patch Bermuda growth can be seen in as little as seven days

** Under ideal growing conditions.

Successful bare spot repairs call for high-quality grass seed.

If you're looking to fill bare spots and thin areas of your lawn, Pennington® Bare Spot Repair is your answer. Pennington® Bare Spot Repair is a regional mixture that establishes rapidly to patch bare spots, pet damaged areas or to seed small new lawns. This grass seed mix establishes quickly and is guaranteed to make your lawn whole again.

PROTECTING YOUR LAWN FROM THE VERY BEGINNING

Seeding Accessories

A

A. SEED STARTER MAT

- Helps hold grass seed in place once applied
- Ideal for use when applying seed on slopes and hills
- Biodegradable mats are easier to use than traditional wheat straw without the mess
- Helps prevent weeds

ITEM#	UPC	CS/PK	COVERS UP TO
100083888	0-21496-00051-0	12/cs	39" x 18'

Help establish your lawn with ease.

Pennington® Seed Seed Starter Mats are made from natural wood fibers which help hold the proper amount of moisture around the seed for superior germination and are ideal for use on slopes or hills to help hold the seed in place, preventing erosion. Pennington's Seed Starter Mats work better than straw and other seed blankets. They degrade without the mess or cleanup and help prevent weeds while the grass is establishing.

A photograph of a well-maintained lawn with a concrete path and steps leading to a house. The lawn is vibrant green and appears to be blowing in the wind. The path and steps are made of light-colored concrete. In the background, there are some plants and a house with a dark door.

ENHANCING YOUR GROWING POWER FOR A BREATHTAKING LAWN

Lawn Fertilizer/ Soil Amendments

*When caused by magnesium and/or sulfur deficiencies

Encourage a better lawn.

Gardeners have been using Epsom salts as a plant nutrient for years because it contains both magnesium and sulfur, which are crucial to plant growth. Pennington® Epsom Salt Plant Nutrient can be used on a variety of plants and makes it easy to provide nutrients to your plants. Epsom salt helps to encourage plant growth to produce excellent yields for lawns, flowers, plants, vegetables and trees, and is very popular among rose growers.

IRONITE®

Nothing greens and grows like Ironite®.

Ironite® brand iron-based mineral supplement and fertilizers provide the answer you need to restore pale, yellow lawns and plants to rich, vibrant green.

Specially formulated to overcome pale color caused by nutrient deficiencies, Ironite® supplement and fertilizers help you maintain a beautiful green lawn and gardens all season long.

- Grow new plants from cuttings
- As simple as cut, dip and plant
- Contains Hormodin® 1 – a root inducing substance
- Propagate roses, hydrangeas, gardenias, rhododendrons, azaleas, and many other popular home plants

ITEM#

100538120

UPC

6-13499-07805-6

CS/PK

12/2 oz.

Transform cuttings into strong, healthy plants.

RootBoost™ Rooting Hormone is a general purpose powder that stimulates root development from stem cuttings, encourages uniform root growth, and results in vigorous, well-rooted new plants. The rooting hormone, Hormodin® 1, facilitates plant propagation from the stem cuttings. Use to propagate roses, gardenias, hydrangeas, azaleas and many more plants listed on the label.

Simply snip the stems above the node, dip the bottom of the stem cutting in water, then swirl the stem in the powder, shake off excess powder, plant the stem in a potting mix medium inside a container, then cover with a plastic bag to create a mini-greenhouse. Place in indirect sunlight to achieve the best results.

The perfect solution to kill moss.

Consumers battle with moss in their lawns and gardens, as well as on walkways, decks, roofs and other structures. In most climates, moss grows vigorously during the cool, wet spring and fall seasons. Central Garden & Pet offers a variety of products formulated to target and treat the problem while protecting surrounding surfaces.

Moss is a significant challenge in the Pacific Northwest, and the problem is expanding outside that region, particularly along the East Coast. The Moss Out!® line of products kills moss on lawns, roofs, walks and structures with easy-to-use liquid and granule formulas.

Our heritage & legacy.

Pennington has a long history in farming and a tradition built around the outdoors starting with the first members of the Pennington family that moved from Europe to Morgan County, Georgia in the 1700s. Being good stewards of the land, wildlife and sharing the love of the outdoors with family and friends has been passed down through the generations as a part of the Pennington heritage. Founded in 1945, Brooks Pennington, Jr. created a company based on these values and over 75 years later we are proud that Pennington Seed is still guided by those principals.

This culture and these values are reflected in all of our products. This is why we know as thrilling as the hunt can be, there's also an excitement that comes from planning and planting quality food plots to attract and hold game on your farm.
